

Liberty™ PX

THE POWER OF
digitalRF™

Checkpoint®

- Slim profile**
- Durable design**
- Maximum alarm integrity**
- Exceptional tag discrimination**
- High-performance electronics**

Choose Liberty PX for environments that demand durability.

Ideal for high-traffic areas and general-purpose applications, the Liberty PX system is designed for maximum durability. Featuring Checkpoint's patented Digital Signal Processing technology, Liberty provides superior detection, as well as advanced two-way communications.

Engineered from impact-resistant, molded-through color thermoplastic, the Liberty PX offers exceptional tag discrimination in a slim, unobtrusive package that can withstand the rigors of a busy retail environment. This durable, economical antenna accommodates optional advertising panel inserts, which can be used to generate revenue through advertising sales or to promote in-store specials.

Next-generation digital RF technology ensures outstanding EAS performance:

- Wide-aisle detection capability is ideal for all retail environments.
- Compatibility with Checkpoint's complete line of 8.2 MHz RF tags and labels allows flexibility.
- Advanced filtering algorithms maximize alarm integrity.
- Two-way communications allow remote review and repair/update via modem or network connections.
- Tagged merchandise can be displayed within 18 inches of sensors.
- System automatically time-/date-stamps all alarms for review.

Liberty PX is engineered for the realities of the retail world:

- Independent antenna alarms allow easy alarm identification.
- System indicator light eliminates need for manual test checks.
- Pedestals can be disabled/enabled individually.
- High-durability base protects electronics from dust, cleaning fluids, etc.
- Custom configurations available for any store.

Specifications

Antenna Dimensions:

Height: 68" (1727 mm)
Width: 19.75" (502 mm)
Depth: 1.5" (38 mm)

Antenna Base Dimensions:

Height: 12" (305 mm)
Width: 19.75" (502 mm)
Depth: 4.25" (108 mm)

Antenna Construction:

Frame: Textured, molded-through color, impact-resistant SMC plastic

Base: Textured, molded-through color, impact-resistant, injection-molded plastic

Weight: 25 lbs. (11.4 kg)
